

MARIPOSA

The wines Mariposa are made in a natural way, preserving the most of the natural aromas, flavours and natural acidity of the grapes of the Dao region. They are light and fresh, to drink young, but still with a good aging potential, which is a characteristic of the wines of the region. They are modern, but carry the character of Dao region.

2020 HARVEST. It was a very demanding year due to some meteorological instability observed throughout the growing season, which required extra care in the vineyard. The winter was hot and dry. In spring, rainfall was normal but irregular and there were some frosts at the beginning of the growing season. Due to the extremely hot and dry summer, the harvest was brought forward to mid-September, with some drop in production, but with high quality.

VINIFICATION. The grapes were harvested manually to 20Kg boxes. The blend composition depends on the yields of each variety in the vineyard. After crushing with full destemming, the grapes go to a small open stainless steel vat, were they macerate under low temperature for 48 hours. The fermentation is slow, under temperature control, with gentle reassemblies.

QUINTA DA
MARIPOSA

Type. red wine
Region. Dão
Denomination. DOC
